Michael Morgan

SPSU Computer Science Alumnus
Consultant, Professional Services, Liaison

Michael is a Consultant in Liaison's Professional Services group. He has ten years of consulting, usability, internet security, and data integration and analytics experience. He graduated top of his class with a Master's in Information Systems from Georgia State University, and holds two Bachelor's degrees in Computer Science and Technical Communication from SPSU. Michael's traveled all over Europe and Asia, loves learning new languages, and ponders theoretical physics over his morning café au lait.

Cloud Data Integrations - Meshing the Old and the New

Michael will reflect on the importance of his education at SPSU and how he leveraged it to launch his career. He will also discuss the importance of a strong business foundation in technical careers. Michael will describe how he uses his combination of technical and business background to solve real world problems as a Cloud Data Integration Consultant.

Let's enjoy Michael's real world IT consulting experience in one of the major data integration solution providers.

Liaison is a global integration and data management company providing unique & high-value solutions to securely integrate, transform and manage complex business information on-premise or in the cloud.
